The Ballad of Major Tom

After a massive solar flare a number of vessels have been damaged and lost the ability to recycle oxygen.

As head of the local system’s Space Rescue team you have been assigned to reach the downed vessels before time runs out.

Use the arrow keys to navigate the perilous asteroid field.

The vessels have lost their lights and communications so you will need to navigate them and reach all 4 vessels before their minute of oxygen runs out.

Keep calm and do your best. They’re counting on you Major Tom.
