Welcome to Dungeon Crawler!

You are stuck in a dungeon crawling with monsters of different types. In order to survive you must match the monsters together to defeat them? You have a limited amount of “energy” you can expend as you traverse through the dungeon. How many monsters can you defeat before you run out and escape?

How to Play

1. You will placed randomly on a board

2. You control the tile with the knight avatar with keys a, w, s, d.

3. Use these keys to move right, up, down and left respectively. Each move you make will use 1 energy.

4. When you have clustered three or more monsters of the same type they will be replaced automatically

5. The score will then adjust accordingly to how many matches were made

6. If you would like to restart the initial game press the button “Restart”

7. If you would like to start a new game click the button “New”

8. Else continue until you have used up all 100 moves

9. See the highest score you can garner
